DETAILED ACTION***Allowable Subject Matter***

Claims 1-31 are allowed. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 19, the prior art fails to teach or fairly suggest, in addition to the accompanying features of the claims, an ion beam scanning system and method comprising energy absorption means of variable thickness for depth modulation of the ion beam, wherein an ionization chamber is upstream of the energy absorption means so as to provide a closed loop control of the dose of irradiation which results in an active scanning system that controls the dose in each volume element. Claims 18 and 21 are allowable by inclusion of previously allowable subject matter in the prior Office Action. Regarding claim 31, the prior art fails to teach or fairly suggest, in addition to the accompanying features of the claim, an ion beam scanning system comprising absorber wedges that can be displaced transverse to the center of the ion beam, a high-performance linear motor for rapid driving of the absorber wedges and beam-intensity-controlled depth-scanning with transverse displacement of the energy absorption means, so that depth-staggered scanning of volume elements of a tumor tissue can be carried out in rapid succession and wherein the linear motor comprises rotors mounted on air bearings. Claims 2-10, 12-17, 20, and 22-30 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
